

RELEASE

MARINE ALUTECH OY AB IS STRENGTHENING ORGANISATION

Juha Moisio, major (Ret.), has been named as CEO of Marine Alutech Oy Ab from April 1, 2024.

Juha has previously worked with the defense forces and the defense industry both in Finland and abroad. He has worked for, among others, at Robonic Oy and is moving to his position from Conlog Oy. Juha is a former army officer and has an BBA in business administration and management.

Juha Moisio:

"I am excited about the opportunity offered to me in a new environment. I will work with top-class experts and deliver world-class products for the Finnish market and abroad. Marine Alutech's boats, built for demanding conditions, are well known around the world, and this is a good reason to continue building the company."

MARINE ALUTECH Oy Ab's current, strongly growing order book and positive future prospects have created the conditions for this strategic organisational change in the group. Juha's long experience in the defense industry will strengthen and support the organisation's international growth.

With the organisational change, Niko Haro, who has been the CEO of the company for 25 years, will become the full-time chairman of the board of Marine Alutech Oy Ab.

We welcome Juha to our organisation!
